

# PACKAGING TECHNICIAN & CONSULTANT

Atlantic is looking to expand its MUST Quality Control Team. The MUST Team ensures that the 75 million customer loads that we monitor and manage for our customers are wrapped to the correct standard. The program is growing exponentially, and you'll have the opportunity to grow with the program while being supported by seasoned experts in sales, engineering, and chemistry. Your day-to-day will involve traveling to our clients' plants across North America to perform audits, optimization, technical service and monitoring of stretch film application processes. If you want to help businesses save money, be more efficient, prevent shipping damage, and meet their sustainability goals, this is the job for you!

## ABOUT ATLANTIC PACKAGING

Atlantic Packaging is the most technical resource in sustainable packaging. Atlantic's focus on innovation and technology has made us a market leader for customers requiring circularity in packaging, packaging equipment, high-performance materials, warehousing, and distribution. Atlantic delivers these solutions daily to our customers in North and Central America. For more information, please visit [www.atlanticpkg.com](http://www.atlanticpkg.com).

## ABOUT THE MUST STRETCH MANAGEMENT PROGRAM

MUST is the most sustainable and efficient stretch film application management system in the industry. MUST provides customers real-time data to ensure that every load of products is wrapped to the correct standard every time. When loads are wrapped optimally to be standardized, consistent, and precise, businesses use less film, virtually eliminate load damage, save money, and become more efficient. Atlantic's MUST Monitoring System has eliminated over 37 million pounds of plastic from the environment and saved our customers \$70 million in 2024. For more information, please visit [www.mustmethod.com](http://www.mustmethod.com).
